

PRIYANKA SONI

Software Engineer | Backend & Distributed Systems | Java / Spring Boot | AWS

+91 9179331518 | sonipriyasoni.92@gmail.com | linkedin.com/in/priyanka-soni-857a92292

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of core backend/distributed systems experience building backend, microservices, and event-driven systems across e-commerce, healthcare, and advertising platforms. Built and contributed to 10+ microservices and 400+ REST APIs, with hands-on experience in Java, Spring Boot, Kafka, AWS, distributed order processing, authentication, payments, caching, and serverless architectures.

TECHNICAL SKILLS

Languages: Java, Python, SQL, Cypher

Backend & Distributed Systems: Spring Boot, REST APIs, Microservices, Kafka, IBM MQ, Feign Client, Eureka, Event-Driven Architecture

Cloud & Infrastructure: AWS Lambda, SQS, S3, Cognito, EventBridge, Step Functions, Secrets Manager, IAM, Docker, Jenkins

Databases & Data: Aurora, SQL Server, Neo4j, Redis, Elasticsearch, Apache Pinot

Security & Architecture: Spring Security, JWT, OAuth 2.0, RBAC, SAGA, Circuit Breaker, CQRS, Chain of Responsibility

PROFESSIONAL EXPERIENCE

Packaged App Development Senior Analyst

Oct 2025 - Present

Accenture | Best Buy, US

- Contributed to modernization of Best Buy's e-commerce Order Management platform, spanning 4+ interconnected systems across OMS, scheduling, reservation, and RMS supporting inventory, eligibility, release, reservation, and fulfillment workflows.
- Modernized 2 major order-processing areas - Release and Transfer/Purchase Orders (TOPO) - helping transition legacy integrations toward a Kafka-based event-driven architecture.
- Developed and supported the OMS Processor distribution-center application for order eligibility, structuring multi-stage business rules using Command / Chain of Responsibility patterns.
- Integrated 5+ major components - IBM OMS, IBM MQ, OMS Processor, Kafka, and AWS Release Manager - enabling asynchronous downstream processing of orders and order lines with persistence in Aurora DB.
- Supported real-time cross-system audits across 4+ platforms to identify inconsistencies between OMS, scheduling, reservation, and RMS data and improve confidence in order-processing accuracy.

Software Developer - Backend & Cloud Platforms

Jul 2022 - Jun 2025

BlueTeak Labs Pvt Ltd, Bengaluru

- Built and contributed to 10+ Spring Boot microservices and 400+ REST APIs spanning Job, Invoice, Subscription, Payment, Timesheet, authentication, and advertising domains.
- Engineered backend workflows across 5 data technologies - SQL Server, Neo4j, Elasticsearch, Redis, and Drools - supporting transactional persistence, graph relationships, real-time search, caching, and rule-driven processing.
- Integrated Stripe payment processing and secured microservices using Spring Security, JWT, and RBAC; containerized services using Docker and automated builds through Jenkins.
- Built serverless authentication for 2 user segments - Basic and Enterprise using Python, AWS Lambda, and Cognito triggers; prevented duplicate registrations using Neo4j checks and optimized token access through Redis TTL caching.
- Implemented centralized credential management using AWS Secrets Manager and scoped IAM roles and developed scheduled automation using Lambda, EventBridge, and Serverless Framework.
- Developed 3 serverless advertising/automation areas - tracking cleanup, overlap detection, and Google Ads optimization using Python, Lambda, Elasticsearch, and Drools, improving campaign targeting and reducing cost per conversion.

ADDITIONAL EXPERIENCE

Software Engineer - Procyon Technostructure | Abbott Lingo

Jul 2025 - Sep 2025

Built a Spring Boot microservices POC for a wearable health-monitoring platform and worked with Kafka, Apache Pinot, ZooKeeper, and Vertex APIs for streaming-data workflows.

Jr. Engineer - Graduate Trainee | BHEL, Bhopal

Jun 2015 - Jun 2016

Contributed to billing software development and worked across the Telephone Exchange and SCR departments, including coding and product-indent workflows.

EDUCATION & CERTIFICATION

B.E., Electronics & Communication Engineering - GGCT Jabalpur, 2013 | 78.19% | AWS Certified Cloud Practitioner - 2024
